

# Gameshire

- The Cooperative Write and Reap Game -

by Rattlebox Games

## The Crown needs crops and cows!

As a tenant farming clan for a whimsical regent, now's your chance to improve your station.

In this cooperative "write-and-reap" game, you and your friends will use the Spring to plan your farms according to the demands from the castle, then in the Autumn, you will harvest your crops and gather your cows for the festival. Throw in enough extra "gifts" and perhaps you'll find yourself lifted up to nobility.

## Reap what you Sow

**Watch your work pay off.**  
Spring: Plan your fields on your map. Choose carefully!

Autumn: Harvest your crops, shading in areas you filled in earlier. Do well and The Crown will love you!

## It's all about family

**Coop Flip & Write (& Reap)**  
Work together to plan your maps and gifts. Benefit from the skills your family learns.

Deliver the right gifts to The Crown and win, or lose, as a family.

## Together apart

**Medieval theme, modern gameplay.**  
Gameshire is well-suited to remote play, with a single "host" displaying the cards and players filling in their own maps.

## All on your own

**Solo and All vs. All play mode**  
If you're by yourself or hosting a large game group, you can use the alternate game mode to play Gameshire.

In the alternate mode, each player writes and reaps their own farm, independent of the other players, with a score at the end to find out who won.
